Code, Text & Graphics Inspection

# **SIGNUM HR** Print Inspection

The Print Inspection **SIGNUM HR** is a highly efficient greyscale vision system and the complete solution for 100% optical inspection of print including characters (OCR) on packaging materials during the packaging process. It offers recognition capacity, operating features and operator comfort that exceeds that of most other vision systems. The high reading speed, integrated illumination and outstanding software make the system the best of its kind.

## PRODUCT HIGHLIGHTS

#### DESCRIPTION

• Criteria: Plain text such as company information, lot, date, 1DC codes and 2D codes

• Application types: Small area recognition, Late Stage Customisation, Large area foil inspection, sachet and stickpack machinery

• Fast evaluation of data due to smart unicode library

 Automatic recognition of character orientation

• Multiple camera systems for

inspection of large area prints available

The teach-in via PDF is a real time saver. Similarly, the copy function allows your

staff to identify multiples of an inspection type on a large area, again saving time. In production, an automated tracking feature ensures that the format mask is in the

### SCANWARE HIGHLIGHTS

correct reading position at all times.

**ON SITE** 

SIGNUM HR creates a virtual character from all readings that were marked as correct. Thus, the virtual character depicts the average value of all previous readings. Ultimately, for each sign, only a single evaluation occurs to establish correctness and readability.
